Tecnologia BeHOT Heat Generating

Il tessuto viene prodotto con filato tecnico **BeHOT** combinando la tecnologia **Sitip Heat Generating** con una speciale costruzione tessile.

BeHOT contribuisce a generare calore superiore a 1° C in fase di allungamento.

BeHOT
Heat Generating Technology
Licensed by AKF By SITIP

In fase di allungamento, diminuendo l'entropia, **BeHOT** genera calore.

La tecnologia **BeHOT Heat Generating** riduce la dispersione di calore e mantiene la temperatura corporea costante durante e dopo l'attività fisica.

 **Utilizzo consigliato:** abbigliamento tecnico sportivo; abbigliamento outdoor / montagna; abbigliamento tecnico / intimo.

BeHOT Heat Generating Technology

The fabric is made with **BeHOT** functional yarn developed with **SITIP Heat Generating Technology** and with a special textile construction.

BeHOT contributes to generate heat more than 1° C by stretch.

BeHOT
Heat Generating Technology
Licensed by AKF By SITIP

When functional **BeHOT** stretches, it generates heat by decreasing the entropy.

BeHOT Heat Generating Technology minimizes the heat loss and keeps the warmth during and after the exercise.

 **Recommended usage:** technical active wear; outdoor / climbing wear; technical inner wear.
